### THE ROAD TO DIGITAL ZONING

#### Step 1: Assess Current Mapping Needs

Identify pain points in your current zoning processes, and determine the types of data and features essential for your team.

#### Step 2: Choose the Right Digital Mapping Solution

Look for software solutions that integrate with existing systems. Prioritize ease of use, real-time updates, and data security.

#### Step 3: Engage Stakeholders and the Community

Involve planners, developers, and the public to promote collaboration and improve transparency.

#### Step 4: Plan for Continuous Updates and Maintenance

Set up regular map reviews to ensure zoning accuracy, and designate a team or partner for ongoing support and updates.
