

# REIMAGINING INSPECTIONS AND FIELD WORKFLOWS WITH ACCELA

Modern inspection programs depend on speed, accuracy, and visibility. Accela replaces manual scheduling, paper checklists, and delayed data entry with a unified inspection workflow that supports inspectors in the field and leaders in the office. From assignment through closure, every step is tracked, standardized, and reportable—enabling agencies to keep up with demand without increasing staff.

## BEFORE: MANUAL AND DISCONNECTED INSPECTIONS

### Manual Inspection Creation

*Manual entry review required*

### Scheduling

*Spreadsheets and calls*

### Field Inspection

*Paper checklists, separate photos*

### Data Entry

*Return to office, re-type data*

### Manual Follow Ups

*Missed Deadlines*

### Reporting

*Delayed, limited visibility*

### Results: Backlogs, Data Delays, and Limited Accountability

## AFTER: ACCELA - ENABLED INSPECTION PROCESS

### Automatic Inspection Creation

*Centralized case record, no manual entry required*

### Rules-Based Assignment

*Optimized scheduling*

### Mobile Field Inspection

*Digital checklists and photo collection*

### Standardized Violations and Notices

*Automated notices and deadlines*

### Automated Follow Ups

*Reminders and re-inspections*

### Real-Time Reporting and Visibility

*Live dashboards and metrics*

### Results: Faster Inspections, Single Source of Truth, and Leadership Visibility

3SG Plus helps agencies turn these capabilities into real operational improvements. By configuring Accela to match inspection types, jurisdictional rules, and field conditions, 3SG Plus ensures workflows are practical for inspectors, consistent across departments, and aligned with reporting and compliance requirements. The result is not just a modern inspection system, but a workflow that actually works in the real world—day one and long term. Contact us today to learn more about how 3SG Plus and Accela can streamline your inspection workflows.
