

ECM CLOUD MIGRATION ROADMAP: A PRACTICAL GUIDE FOR SECURE, LOW- RISK MODERNIZATION

A step-by-step approach to upgrading and moving your ECM platform to the cloud.

THE CHALLENGE: THE COST OF STANDING STILL

Legacy ECM systems were once the backbone of your operations; but today, they often become a bottleneck. Keeping your system on-premises creates a compounding cycle of upgrade challenges, security vulnerabilities, and performance limitations.

Despite these issues, many organizations hesitate to migrate to modern cloud infrastructures. The fear of operational disruption, resource constraints, and an unclear path forward leads to migration paralysis. Delaying the move doesn't just stall progress. It increases risk and decreases the value of your data.

THE VISION: MODERNIZATION WITHOUT COMPROMISE

A successful migration isn't just about moving servers; it's about unlocking a more agile way of working. Once migrated, your organization benefits from:

- **Secure, scalable cloud infrastructure** that grows with you.
- **Faster upgrade cycles** with a significantly lower maintenance burden on IT.
- **Seamless integration with critical platforms** like Accela and advanced reporting tools.
- **Universal access and optimized performance** for a modern workforce.

THE ROADMAP: A PHASED APPROACH TO SUCCESS

Cloud migration shouldn't be a leap of faith. It should be a structured, predictable journey. Here is how we ensure your transition is seamless.

AVOIDING THE PITFALLS

Even the best intentions can go astray without experience. 3SG Plus can help you navigate the common traps that derail cloud migration projects:

- **The IT-Only Fallacy:** Treating migration as a server move rather than a business transformation.
- **Data Hoarding:** Migrating outdated or unnecessary data that clogs your new system.
- **Integration Gaps:** Underestimating the complexity of connecting to external APIs or legacy apps.
- **Ignoring the User:** Failing to plan for user adoption and training early in the process.

ABOUT 3SG PLUS

3SG Plus is a technology reseller and IT managed services provider headquartered in Columbus, Ohio. Our services include enterprise content management, digital transformation, and cybersecurity. We are an authorized OnBase ECM reseller, integrator, and professional services provider.

We provide customized OnBase deployments, and we integrate OnBase software with other client systems to enhance functionality and effectiveness. We also provide onboarding assistance and post-implementation support.
